Recording a CAPM Safety Assessment

Overview

This Knowledge Base Article discusses steps for completing a **CAPM Safety Assessment**. The **Safety Assessment** is completed for Screened In/Screened In AR intakes with an Intake type of CA/N, Dependency, and Family in Need of Services (Stranger Danger). The **Safety Assessment** allows users to review specific safety factors and identify safety threats for the child participants. After identifying safety threats, reviewing historical information, and considering child vulnerabilities protective capacities, the user can then determine a safety response for the child participants. If needed, the user can also designate a safety plan.

To complete a **Safety Assessment**, complete the following steps.

Navigating to the case

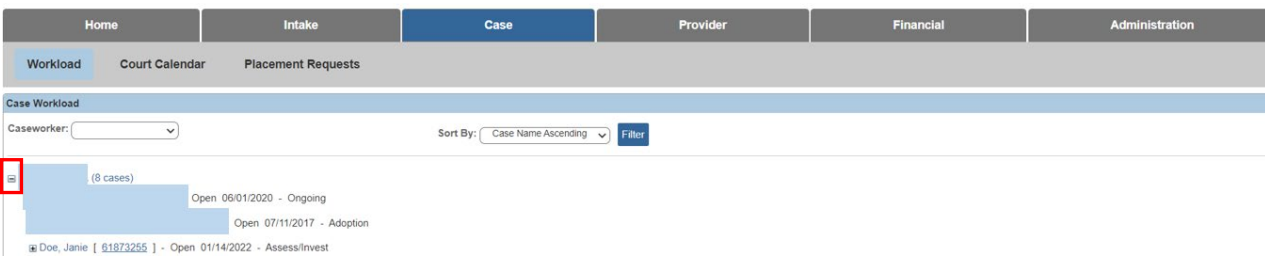

1. From the Ohio SACWIS Home screen, click **Case**.

2. Click **Workload**.

3. Click the plus sign to expand the **Case Workload**.
4. Click the **Case ID** hyperlink.

The **Case Overview** page displays.

Recording a CAPM Safety Assessment

Creating CAPM Safety Assessment

1. Click the **Safety Assessment** link in the navigation pane.

The screenshot shows the 'Case' tab selected in the top navigation bar. The left-hand navigation pane has 'Safety Assessment' highlighted with a red box. The main content area displays case details for 'Doe, Janie', including the case name, ID, status ('Assess/Invest Open'), address, agency ('County Department of Job and Family Services'), and primary worker. Below the details is a 'Case Actions' section with a message: 'One or more active case member(s) is missing demographic information: race, ethnicity, gender, DOB'. At the bottom, there are tabs for 'Action Items', 'Case Alerts', 'Dashboard', and 'Assignments / Eligibility'.

The **Safety Assessment** screen appears.

2. Click the **Add Safety Assessment** button.

The screenshot shows the 'Safety Assessment' screen. The left-hand navigation pane has 'Safety Assessment' highlighted with a green box. The main content area displays the 'Alternative Response Assessment' for 'Bear, Mama'. Below the case name is a 'Safety Assessment Filter Criteria' section with a 'Date Range' field (with calendar icons) and a 'Sort Results By' dropdown menu set to 'Approval Date (Descending)'. There are 'Filter' and 'Clear Form' buttons. Below this is a 'Safety Assessments' section with the message 'No Results Returned'. At the bottom, the 'Add Safety Assessment' button is highlighted with a red box.

The **Identifying Information** tab screen displays.

Recording a CAPM Safety Assessment

Linking an Intake to the Safety Assessment

Important: The **Safety Assessment** is completed in response to a screened in CA/N, Dependency and Family in Need of Services (Stranger Danger);0 The intake being assessed is linked to the **Safety Assessment**.

1. Click, **Link Intake**.

The screenshot shows the 'Identifying Information' tab of a safety assessment form. At the top, there are navigation tabs: 'Identifying Information' (active), 'Historical Summary', 'Safety Factor', 'Safety Response', and 'Approval'. On the left, there is a 'Linked Activity Logs' section with a left arrow and the text 'There are no Activity Logs linked to this Intake.' The main content area is divided into sections. The 'Intake Information' section has a header and the text 'There are no Intake(s) linked to this Safety Assessment.' Below this is a blue button labeled 'Link Intake', which is highlighted with a red rectangular box. The 'Family Information' section has a header and a paragraph: 'The Safety Assessment is completed on the family who is subject of the report. For the purpose of completion of the Safety Assessment, family includes the following individuals, as applicable:'. Below this are four bullet points: 'ACV(s)', 'Siblings of ACV(s)', 'The parent(s) or caretaker(s) of the ACV(s)', and 'Step/Half siblings of the ACV(s) living within the ACV's home'. At the bottom of the form, there is a dark grey bar with buttons for 'Previous', 'Next', 'Apply', 'Save', and 'Cancel'.

The **Available Intake(s)** screen appears, displaying all Screened In or Screened In AR CA/N, Dependency, and Family In Need of Services Intakes for the current case episode that have not been dispositioned.

2. Select one or more Intakes by placing a checkmark(s) in the relevant check box(es).
3. Click, **Save**.

The screenshot shows the 'Available Intake(s)' screen. At the top, there is a blue header with the text 'Available Intake(s)'. Below this is a table with the following columns: 'Intake ID', 'Decision Date / Time', 'Intake Category', 'Intake Type(s)', and 'Agency'. The table contains four rows of data. The first column of the table has four empty checkboxes, with the first one highlighted by a red box. The 'Agency' column for all rows is 'County Children Services Board'. At the bottom of the screen, there is a dark grey bar with buttons for 'Save' and 'Cancel'. The 'Save' button is highlighted with a red rectangular box.

	Intake ID	Decision Date / Time	Intake Category	Intake Type(s)	Agency
<input type="checkbox"/>		02/08/2022 02:40 PM	CA/N Report	Physical Abuse	County Children Services Board
<input type="checkbox"/>		02/08/2022 12:00 AM	CA/N Report	Physical Abuse	County Children Services Board
<input type="checkbox"/>		04/19/2021 07:15 AM	Dependency Report	Dependent Child	County Children Services Board
<input type="checkbox"/>		04/14/2020 11:45 AM	CA/N Report	Neglect Physical Abuse	County Children Services Board

The system returns to the **Identifying Information** tab screen, displaying the selected **Intake Information**.

Recording a CAPM Safety Assessment

Note: The **Identifying Information** tab has a pane on the left-hand side of the screen (**Linked Activity Logs**), which can be expanded or collapsed. Once an intake has been linked to the **Safety Assessment**, this pane will populate with all activity logs linked to the Intake. Each **Activity Log** displays as a drawer which can also be expanded; this allows you to see the following details for each of the **Activity Logs** displayed: **Date / Time of Activity**, **Type of Contact**, **Participants**, **Narrative**, and **Correction(s)** (if present).

1. Click the **Add Child** button.

Intake ID	Decision Date / Time	Intake Category	Intake Type(s)	Initiation Date / Time	Agency
[redacted]	02/01/2022 01:30:00 PM	CA/N Report	Neglect	02/01/2022 02:00:00 PM	County Department of Job and Family Services

Family Information

The Safety Assessment is completed on the family who is subject of the report. For the purpose of completion of the Safety Assessment, family includes the following individuals, as applicable:

- ACV(s)
- Siblings of ACV(s)
- The parent(s) or caretaker(s) of the ACV(s)
- Step/Half siblings of the ACV(s) living within the ACV's home
- Paramour of the parent/caretaker
- Children of the paramour residing in the home
- Other children residing in the home of whom the parent/ caretaker has custody/guardianship
- A related or unrelated adult residing in the home who has routine responsibility for the care of the ACV(s) and his/her sibling(s) (e.g., provides supervision or assists in meeting the basic needs, such as feeding and/or bathing the child)

Recording a CAPM Safety Assessment

Adding Child Participants

When completing a **Safety Assessment**, the user must add child participants. The participants are selected from a list of active case members. The Family Information section of the **Safety Assessment** includes guidance about who should be linked to the **Safety Assessment**. All children in the family should be included on the **Safety Assessment** even if they were not included on the intake. Once a case member has been added to the **Safety Assessment**, his/her name will no longer appear on the **Available Participants** list. If he/she is deleted from the **Safety Assessment**, his/her name will return to the list of **Available Participants**. After adding a child, the user selects applicable **Child Vulnerabilities**.

1. Select the **Participant(s)** by checking the box(es) for each.
2. Click **Save**.

	Name	DOB	Age	Gender
<input type="checkbox"/>	Black, Sirius	01/01/1980	42	Male
<input type="checkbox"/>	Potter, Harry	01/01/2020	2	Male

Reviewing Historical Intake Summary

Once child and/or adult participants have been added to the **Safety Assessment**, the **Historical Summary** tab will populate with **Historical Intake Information** for the participants. The page is divided into 2 sections: **Historical Intake Summary for Children in the Family** and **Historical Intake Summary for Adult Participants**. The participants under each section display **Name, Person ID, Gender, Age, DOB**, and the number of intake records found.

All the intakes with this child as an ACV/CSR or AP/ASR are displayed.

Each Intake displays with the **Intake ID, Category, Type, Decision Date, Case/Date**.

1. Click **view** to view the intake details.

The screenshot shows a navigation bar with tabs: Identifying Information, Historical Summary (selected), Safety Factor, Safety Response, and Approval. Below the tabs is a section titled "Historical Intake Summary for Children in the Family". A note states: "For each child below, all Screened In/Screened In AR CA/N or Dependency Intakes in which the child has a role of ACV/CSR or AP/ASR are displayed." The child's name is "Potter, Harry" and age is "Male Age 2, DOB 01/01/2020 - (3)". There are three intake records listed:

Intake ID:	Category:	Type:	Decision Date:	Case Disposition / Date:
view	Dependency Report	Dependent Child	04/19/2021	
view	CA/N Report	Physical Abuse	01/04/2020	Unsubstantiated/02/01/2020
view	CA/N Report	Physical Abuse	02/08/2022	

At the bottom of the interface, there are buttons for "Previous", "Next", and "Close".

The Intake Details pane is populated with the selected intake. It displays the **Intake ID, Decision Date, Intake Participants** (with role), **Intake Narrative**, and the **Case Analysis**.

There will be a card displayed for each allegation on the intake.

Note: The system will display intakes for each participant. If multiple **Safety Assessment** participants are linked to the same intake, the intake will display under each participant's

Recording a CAPM Safety Assessment

drawer. Once an intake has been viewed in the **Intake Details Pane**, the (v) icon will display next to that intake.

1. Click **Next** to navigate to the next tab, or click the next tab (Safety Factor).

Has any member of the family or other person having access to the child made a credible threat, describes or acts toward the child in extremely negative terms or have extremely unrealistic expectations of the child which would result in serious harm to a child?

No **OR** Select all that apply below:

- Caretaker directly, or indirectly, threatens to cause serious harm to the child in a believable manner (e.g., kill the child, not feed the child, lock the child out of the home)
- Caretaker plans to retaliate against the child for CPS involvement
- Caretaker threatens the child with extreme or vague but sinister punishment
- Caretaker uses extreme gestures to intimidate the child
- Caretaker committed an act that placed the child at risk of significant/serious pain, or which could have resulted in impairment or loss of bodily function
- Caretaker repeatedly describes child in a demeaning or degrading manner
- Caretaker transfers their feelings toward someone they hate onto the child
- Caretaker believes the child is demonic, possessed, the devil, etc
- Scapegoating that results in dangerous behaviors to child (e.g., suicidal gestures, runaway, alcoholism/drug use/abuse, unruly/delinquent behaviors)
- Caretaker chooses not to assume the parental role and shows no interest in the child for extended periods of time (abandonment)

Explain: ([expand full screen](#))

[Child Vulnerabilities](#) ^

PHYSICAL

- The child is young (birth to five years of age).
- The child has an acute physical illness that requires special care and attention.
- The child's soft spot (on the head) has not yet closed.
- The child is physically unable to remove him/herself from a situation.
- The child cannot verbalize that maltreatment is occurring.

COGNITIVE

- The child cannot recognize actions that are neglectful.
- The child cannot recognize actions that are abusive.

EMOTIONAL

- The child overreacts to audible noises
- The child is overly sensitive to physical touch.

BEHAVIORAL

- Infant is colicky or cannot be consoled.
- Child is exhibiting signs of withdrawal (trembling, irritability, excessive crying, poor feeding, etc.)
- The child has difficulty sleeping.
- The child is unable to self soothe.
- The child is in a stage of development that creates parental frustration (e.g., the child is not potty trained, has temper tantrums, bites).

Recording a CAPM Safety Assessment

2. Enter narrative information in the **Adult Protective Capacities** text box.

Note: This text box has a special function. When you scroll down the page, the textbox will remain at the top of the page. This allows you to scroll and see other information on the page and still be able to enter narrative information.

The **Adult Protective Capacities** section displays the list of adult participants. Each parent/guardian/custodian/caretaker or other adult participant displays with the list of **Adult Protective Capacities** selected from the **Manage Protective Capacities** page.

Adult Protective Capacities

What strengths and resources does the family have that can reduce, control, and/or prevent threats of serious harm? How does the family utilize these protective capacities to ensure child safety? Include the consideration of each caretakers cognitive, emotional and behavioral abilities available to protect a child. ([expand full screen](#))

Recording a CAPM Safety Assessment

Safety Response for Active Safety Threats

If there are **Active Safety Threats**, the **Safety Response** screen tab displays with a list of **Identified Safety Threats**. The **Safety Factors** which were identified as a safety threat display in bold; the **Safety Factor Examples** selected are in a bulleted list under each Safety Factor.

CASE NAME / ID: Charlesworth-Dewitt, Janey Hacksaw / 00000000 SAFETY ASSESSMENT ID: 00000000 STATUS: In Progress

Identifying Information | Historical Summary | Safety Factors | **Safety Response** | Approval

Identified Safety Threats

The Child has inflicted physical injuries.

- Positive toxicology with harm to infant identified (withdrawal symptoms).

Drugs and/or alcohol is used by members of the family or persons having access to the child that places the child in immediate danger of serious harm.

- Adult is abusing legal or illegal substances or alcohol to the extent that control of his/her actions is significantly impaired.
- Due to drug and/or alcohol abuse, the caretaker is unable, or will likely be unable, to care for the child.
- Due to drug and/or alcohol abuse, the caretaker has harmed, or is likely to harm, the child.

The Caretaker is unwilling or unable to meet the child's immediate needs for sufficient supervision, food, clothing, and/or shelter to protect child from immediate danger of serious harm.

- Caretaker is unable or unwilling to provide a safe sleep environment for an infant including co-sleeping, inappropriate bedding in infant's sleep surface (stuffed animals, toys, pillows, quilts, blankets, wedge positioners, bumpers or other loose bedding).

The **Child Vulnerabilities** section displays the list of child participants. Under each child is a list of the previously selected **Child Vulnerabilities** for each child.

[LastName, FirstName1 / 0000000](#) - Female Age xx, DOB 01/01/1900 [Expand All](#)

Child Vulnerabilities

PHYSICAL

- The child is young (birth to five years of age).
- The child has an acute physical illness that requires special care and attention.
- The child's soft spot (on the head) has not yet closed.
- The child is physically unable to remove him/herself from a situation.
- The child cannot verbalize that maltreatment is occurring.

COGNITIVE

- The child cannot recognize actions that are neglectful.
- The child cannot recognize actions that are abusive.

EMOTIONAL

- The child overreacts to audible noises
- The child is overly sensitive to physical touch.

BEHAVIORAL

- Infant is colicky or cannot be consoled.
- Child is exhibiting signs of withdrawal (trembling, irritability, excessive crying, poor feeding, etc.)
- The child has difficulty sleeping.
- The child is unable to self soothe.
- The child is in a stage of development that creates parental frustration (e.g., the child is not potty trained, has temper tantrums, bites).

Recording a CAPM Safety Assessment

The **Adult Protective Capacities** Section displays the previously selected **Adult Protective** capacities under each adult.

Adult Protective Capacities

[LastName, FirstName1 / 0000000](#) - Female Age xx, DOB 01/01/1900 [Expand All](#)

Protective Capacities ^

BEHAVIORAL

- The caretaker is physically able to parent
- The caretaker displays affection for the child (hugs, tenderness, consoles the child)
- The caretaker has a capable/competent person supervising the children in the caretaker's absence

COGNITIVE

- Caretaker understands the child's diagnosis and the child's needs in relation to the diagnosis

EMOTIVE

- The caretaker expresses love for the child.

[LastName, FirstName1 / 0000000](#) - Male Age xx, DOB 01/01/1900

There are no protective capacities selected for this adult.

1. From the drop-down menu, select a **Safety Response** for each child.

Safety Response

LastName, FirstName1 / 0000000 - Female Age xx	ACTIVE SAFETY THREAT	Out-of-Home Safety Plan
LastName, FirstName2 / 0000000 - Female Age xx	SAFE	
LastName, FirstName3 / 0000000 - Female Age xx	SAFE	

For child(ren) with an active safety threat, there is an **Active Safety Threat** badge. Children who do not have an active safety threat have a **Safe** badge.

Note: Children who have been marked deceased on their person profile have a Child Deceased safety response by default and the dropdown is disabled.

2. Enter narrative information in the textbox.

This narrative textbox is used to provide rationale for the Safety Response identified for the children.

Recording a CAPM Safety Assessment

- Click **Next** to navigate to the **Approval** tab.

Rationale to support the Safety Response identified for the child(ren):

Provide summarization of the identified safety threats, child vulnerabilities and adult protective capacities. Explain the identified safety plan for the child(ren). ([expand full screen](#))

Approval Information

The approval tab displays any outstanding issues to be resolved prior to the **Safety Assessment** being routed for approval. If there are no outstanding issues, the page displays with a message indicating the **Safety Assessment** is ready for approval.

For outstanding issues, the page displays a list of the outstanding issues in grid format. The tab is displayed in bold and the issues which need addressed are displayed under the appropriate tab. This allows you to see which section to which you need to navigate to address the issues.
