

SACWIS Reporting

Overview

Ad Hoc Reporting

Real Time Reporting

Automatically Limited Data

applies for both adhoc and RT

```
SELECT AGENCY_NAME FROM AGENCY;
```

```
AGENCY_NAME  
-----  
Butler County ...
```

```
AGENCY_NAME  
-----  
Athens County ...
```

Automatically Limited Data

applies for both adhoc and RT

```
SELECT COUNT (*) FROM CASE_BASE;
```

```
COUNT (*)
```

```
-----  
29056
```

```
COUNT (*)
```

```
-----  
7554
```

State-Wide Data Available

applies for both adhoc and RT

```
SELECT COUNT (*) FROM SACWIS.CASE_BASE ;
```

```
COUNT (*)
```

```
-----  
113199
```

```
COUNT (*)
```

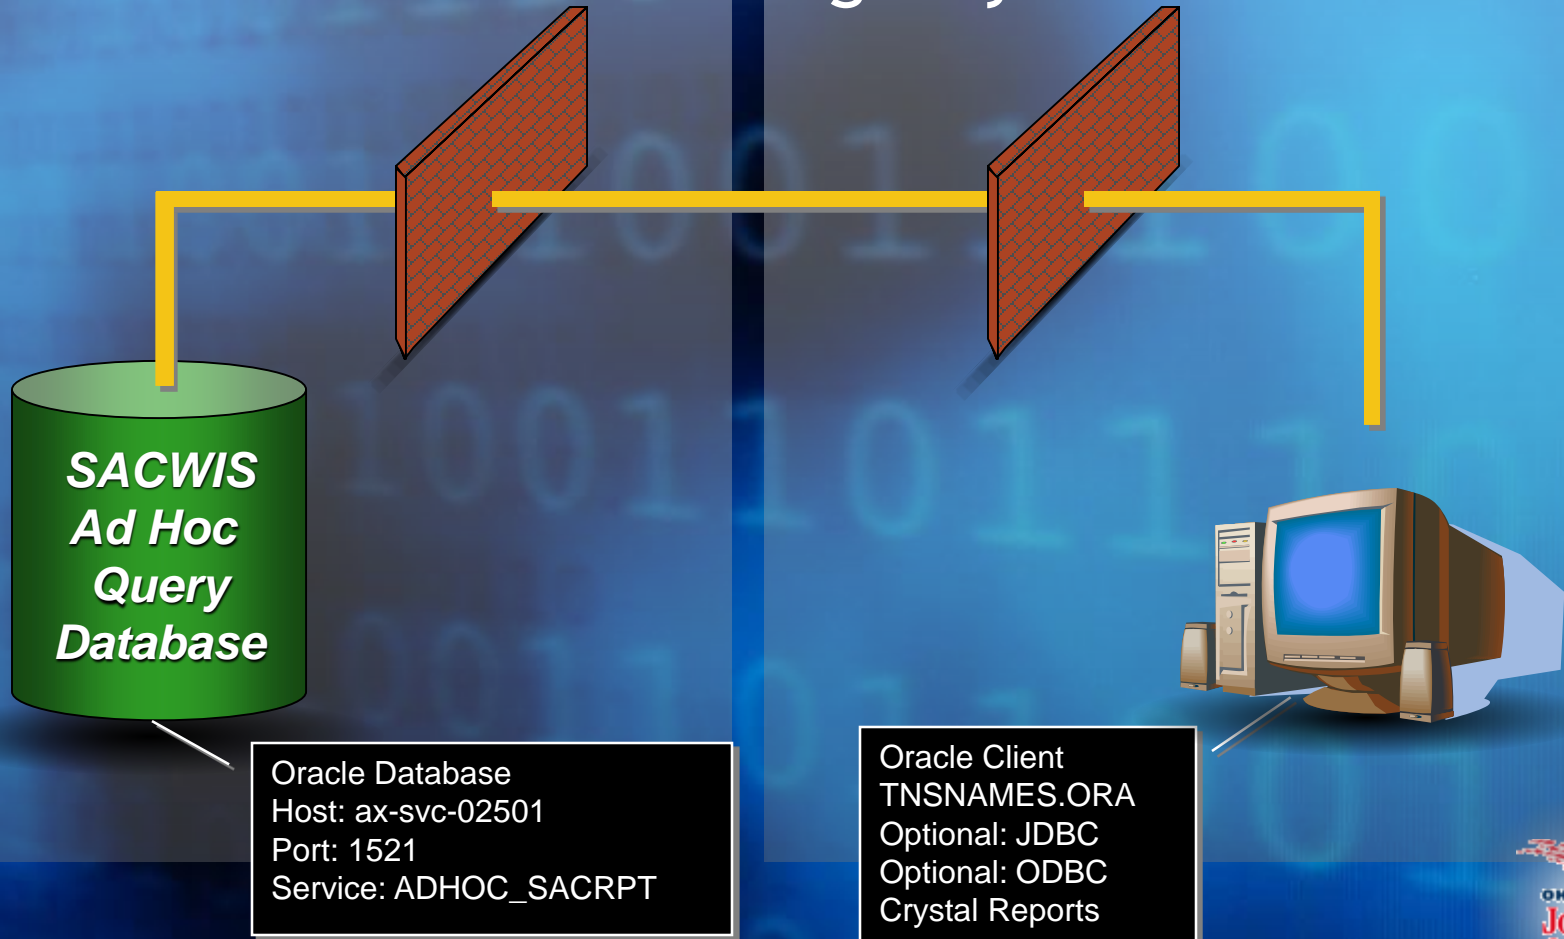

```
-----  
113199
```

Database Details

- Contains all tables that are in production
- Separate copy from SACWIS database
- Read Only connections
- “Ad-Hoc” Refreshed nightly
- “Real Time” is refreshed within milliseconds

Database Details

- Access to the database requires
 - Network connectivity
 - Database user accounts
 - Software to access the data

Network Connectivity

- On State Network = relatively simple
- Off State Network = more complex
 - Firewall configuration
 - Network Address Translation
 - IP addresses for databases vary from documented State Network addresses

Database User Accounts

- Database Account for each individual
- Requested via INFOSEC Form 7078
- Metro / System level accounts available as needed
 - Database-to-database access, if you have Oracle
 - Local/Ancillary Application, if you are developing software yourself

Software to Access Data

- Crystal Reports
 - Assists in building queries and reports
- Oracle, SQL Server, etc
 - Requires local expertise in these database systems
- Low-level view of the data
 - Data is available as it is stored by SACWIS
 - Data is spread across many tables
 - Application Data knowledge needed to build reports

Major Data Areas
