
ADMINISTRATION

- An issue preventing Managed Care Plan and Portal Coordinators from adding their own Coordinators under Agency Information has been resolved.
- Agencies may now end date Agency Configuration records if the associated employee has a job (past or present) that is within the begin/end date of the configuration record.

CASE

- The following changes will be made in the system as part of the ongoing AFCARS initiative:
 - The Initial Removal Reason of Custody Relinquishment has two new values of **Relinquishment – Medical Treatment** and **Custody and Relinquishment -Mental Health Treatment**.
 - New values for AFCARS Element #71 – Environment at Removal have been added: **Parent Household, Relative Household, Legal Guardian Household, Relative Legal Guardian Household, Justice Facility, Medical / Mental Health Facility**, and **Other**.
 - Two new Radio Buttons will display for AFCARS Elements 72 & 73 if **AWOL at Removal** has been selected: **Child is considered a Runaway** and **Child's whereabouts unknown but not considered a Runaway**.
 - The following Removal Reasons on Initial Removal have been deactivated: **Child Drug Affected (Child Effected by Substance Abuse), Sibling Removal, Child of Minor Parent** and **Dependency**.
 - The system was displaying a Java Error when the View link was clicked on an Initial Removal Record and a Placement Record. This has been corrected.
 - The system will require Sibling Relationship Verification for the child at time of Adoption Case Seal / Secure.
- Users will be able to select PASSS as a reason for completion for all new BASICS questionnaires.
- The Candidate for Foster Care tab will no longer display if case participants are reimbursable for Prevention Services.
- Bridges Ongoing Eligibility and Application records for merged persons have been corrected.
- Bridges Ongoing Eligibility uploaded documents may now be viewed and downloaded.
- State System Administrators may now remove Family Case Plan approvals when a Caseworker or Supervisor signature is recorded.

INTAKE

- The following changes will be made in the system as part of the ongoing AFCARS initiative:
 - Information on each federally recognized American Indian and Alaskan Native tribe is maintained by state users and will now contain a field to store the EPA code for the tribe to be used in AFCARS reporting.
 - The EPA code will be added to Tribe Search criteria.
 - New question added to the Pregnancy/Parenting tab in the Person Medical module: Has this person ever fathered or given birth to any children? When there is at least one Pregnancy Details record (excluding created in error) with an Outcome value of "Live Birth," "Surrendered for Adoption," or "Neonatal Death," the question will be set to Yes and disabled. If the Pregnancy Detail record(s) are updated such that the above condition is not met, the field will remain set to yes, but will be enabled.
- NCANDS errors revealed that some intakes were completed with both Alternative Response and Traditional disposition values. This happens when a user enters AR dispositions on some allegations, then completes a pathway switch, then enters the remaining dispositions. To prevent this error, the pathway switch functionality will clear the disposition on all allegations for the affected screened in AR intake(s).

REPORTS

- Two new columns have been added to the CPOE Substitute Care Report for Child's Age and Length of time (in Days) to the report.
- Three new columns have been added to the CPOE In-Home Report for Active Safety Plan, Accepted Maltreatment Reports and Length of Time (in days) the Case has Been Open.

FINANCE

- Children with disrupted adoptions will display correctly in Part 3 and part 5 of Statistical Reporting.
- OhioSTART functionality can now accept partial units.
- The following changes will be made in the system as part of the PASSS initiative:
 - PASSS state workers will receive notifications 24 hours in advance
 - Person Search and Provider Search will be available in the portal.
 - State Fiscal Year will be updated upon selection.
 - OhioKAN security will be set up in Production
 - PASSS draft and pending time stamp will be updated to 24 hour time.
 - PASSS denials will set the initial review to Pending status.
 - Denied applications with sustained appeals will be set back to Pending.
 - Errors observed upon entering the portal have been resolved.
- All payments will be appropriately identified when they are QRTP.
- State payments will be created for every payment request for a congregate care setting.
- Payment Change Events will be created when a reimbursability record is saved.

PROVIDER

- The following changes will be made in the system as part of the ongoing AFCARS initiative:
 - Household Marital Status will display the static message, "Check Person Marital status information for provider member when updating Household Member marital status". A notification will be sent when Marital Status has been changed.
 - A validation message will appear if there is not at least one current address with 'Physical' or 'Residence' type that is not Unknown.

RTIS

- The RTIS Safety Hazard narratives no longer converts text data.
