Helpful Hints

- 1. Users will be deactivated from the system if they fail to log in at least once every 60 days. When that occurs, a new JFS7078 form must be submitted to reactivate the employee.
- 2. If a security error screen appears when a user logs in to Ohio SACWIS, it may be that they do not yet have any User Groups assigned to their profile.
- 3. Every 6 months, the technical point of contact at your agency will be asked to complete a review of every employee listed for your agency and their security user groups to ensure:
 - a. Only current, active employees have access to Ohio SACWIS
 - b. The User Groups assigned to the individual provide only enough access to the system to allow them to complete their job responsibilities.
- 4. Once an individual leaves agency employ, it is vital that their access be terminated immediately
