Helpful Hints

1. Users will be deactivated from the system if they fail to log in at least once every 60 days. When that occurs, a new JFS7078 form must be submitted to reactivate the employee.
2. If a security error screen appears when a user logs in to Ohio SACWIS, it may be that they do not yet have any User Groups assigned to their profile.
3. Every 6 months, the technical point of contact at your agency will be asked to complete a review of every employee listed for your agency and their security user groups to ensure:
 - a. Only current, active employees have access to Ohio SACWIS
 - b. The User Groups assigned to the individual provide only enough access to the system to allow them to complete their job responsibilities.
4. Once an individual leaves agency employ, it is vital that their access be terminated immediately
